## **The Dale Griffin Ride for Life Fund has helped many families. 3-Month Summary**

### **July 2016**

We continue to assist the mother of a 2-year-old-boy with gas vouchers for the child to see an ophthalmologist in Grand Rapids to determine if he needs surgery to correct his vision.

We are assisting the mother of a premature-baby-girl with gas voucher to and from the NICU in Kalamazoo.

We continue to assist the mother of a 3-month-old-baby who continues to visit her baby in the NICU in Kalamazoo.

We are assisting the mother of a 3-month-old-baby-boy with gas vouchers to and from the NICU in Kalamazoo.

We are assisting the mother of a premature-baby-girl with gas vouchers to the NICU in Kalamazoo.

We assisted the mother of a 16-year-old-girl with gas vouchers to see her specialist in Grand Rapids. The child has many health conditions including diabetes and Cystic Fibrosis.

We assisted the mother of a 14-year-old-girl with gas vouchers to get to and from her counseling appointments. The child has behavioral problems.

### **June 2016**

We continue to assist the mother of a 2-year old boy with gas vouchers for the child to see the specialist in Grand Rapids. The child has to be tested for C-Diff.

We are assisting the mother of a premature baby boy with gas voucher to and from the NICU in Kalamazoo.

We assisted the mother of a 4-year old boy with gas vouchers to get to urgent care. The child was suffering from an allergic reaction.

We assisted the mother of a 1-year old girl with high lead levels, with gas vouchers so she could have bloodwork.

We continue to assist the mother of a baby born 14 weeks early with gas vouchers to go to Kalamazoo to learn how to care for her baby when he is big enough to come home. The child only weighed 1.2 lbs. at birth.

We assisted the mother of a 1-year old with gas vouchers. The child had an appointment in Ann Arbor with the Nephrologist.

We assisted the father of a 4-year old boy with gas vouchers so the child could get dental care in Ann Arbor.

We are assisting the mother of a premature baby girl with gas vouchers to and from the NICU in Kalamazoo.

## **The Dale Griffin Ride for Life Fund has helped many families. 3-Month Summary**

### **May 2016**

We are assisting the mother of a baby born 14 weeks early with gas vouchers to go to Kalamazoo to learn how to care for her baby when he is big enough to come home. The child only weighed 1.2 lbs. at birth.

We are assisting the mother of a baby born 3-weeks early and is currently in the NICU in Kalamazoo with gas vouchers.

We continue to assist the mother of a 2-year old boy with gas vouchers for the child to see the specialist in Grand Rapids. This visit was to see the pediatric ophthalmologist to see if the child will need surgery to correct vision.

We assisted the mother of a 18-year old whom suffered major brain damage in an auto accident when he was 4-years old, with gas vouchers for him to go to Mary Free Bed in Grand Rapids.

We assisted the father of a 2-year old boy with gas vouchers. The child has an appointment at Motts Children's Hospital to see an audiologist.

## Impact Statements

### July 2016

A 65-year-old-man came to our Albion office stating that his Medicaid wasn't working and he needed assistance with his prescriptions. He said he had spoken with his case worker many times and she didn't know how to fix the problem. This gentleman has been drawing SSI for over 25-years and has always had Medicaid. I searched for him in the system and discovered the problem. He recently turned 65 years old and the State of Michigan stated that he was Medicare eligible but not enrolled. Medicaid rules state that if someone is eligible for Medicare and they are not enrolled, Medicaid will not pay for any services.

I informed him that he would need to apply for Medicare at the local Social Security office in Battle Creek. He said he had already applied and they told him that he didn't qualify because he was on SSI. I called the local office and they confirmed that he did not qualify, so I asked the representative to send him a denial letter.

The following week the gentleman returned with the denial letter. I emailed the letter to the State of Michigan so they could change his status for coverage. Medicare was his only insurance coverage. Their reply informed me that the form that he received from Social Security would not be sufficient and they needed another letter from them. After that response, I knew this process was going to take a while to resolve.

As we continued to talk, I realized he had been out of his insulin for over a month and I was concerned for him. I contacted his primary care doctor and asked if they had any samples and they did. So I used the Health Assistance Fund (HAF) to get his other medicines and sent him to his doctor to get the expensive insulin.

The following week he came back to our office and stating that his doctor's office had made a mistake and they did not have the insulin. I called the office and they stated that they were waiting for the sale rep to bring samples. I then contacted my supervisor and asked if CHC had any Lantus that we could donate to his primary care doctor and have them dispense it to him. Fortunately, we had some in stock and she approved the donation. I contacted the primary care doctor's office to see if they would accept the donations from CHC, and dispense it to the patient, and they said yes. The next day I took the medication to Eaton Rapids to his primary care doctor. We were able to get him enough insulin to cover until the rep. delivered more to the office. I followed up with the Social Security office and they scheduled me for a call back date of September 9th. They said they are trying to fix the problem, but it could take up to 90 days from the time he applied for Medicare. I will continue to follow up with him until this issue is resolved.

### June 2016

Recently a diabetic gentleman came into see one of our Navigator's for help with his medications. He had recently enrolled in the Marketplace, picking a plan that seemed to be the most affordable. After seeing his doctor for the first time in months, he took his prescription into the pharmacy. After arriving at the pharmacy to purchase his medications he was told his insurance plan did not cover the quantity of Insulin needed. The gentleman then called his provider's office and they directed him to CHC for additional help. After hearing his story our Navigator suspected something was not right and called his insurance company. After being bounced from person to person for 45 minutes she finally connected with a representative who explained that our client needed an override on his account to receive the quantity of Insulin needed. The customer service agent helped us to obtain the override needed and our patient was able to get his medications. Had we not called the insurance company he would have either paid for the expensive medication or went without.

### May 2016

## Impact Statements

We recently assisted a 30-year old woman who is bipolar and had recently lost her job and insurance. She was in dire need of her bipolar medicine, she had only a one day supply left. She had gone to her pharmacy to see how much the medicine would cost without insurance and they told her it would be over \$1,000.00. Her only source of income will be unemployment which does not begin for a couple of weeks. She did an application for insurance through Marketplace but it would not be active for 7-10 days. We called the doctor who writes her prescriptions to see if they had any samples to get the woman through until her new insurance starts. They stated that they did not have any samples available. We then contacted the company that makes the medication to see if they could help. We explained the situation and the company was able to sponsor her medication through her pharmacy for a 14-day supply with one refill to ensure she has enough medication until her insurance starts. This was the first time we had contacted this pharmaceutical company and we were all impressed with their willingness to help and quick response. Our help meant the world to this woman because she knew how well this medication works and was afraid to experience the side effects had she had to go without it.
